

All Around You, Local Biodiversity is a Year 2 Science Unit focusing on local biodiversity. The unit is closely aligned with the **Curriculum into the Classroom (C2C) Year 2 Unit 3 Good to Grow, and developed by the Sunshine Coast QESSI Hub for Sunshine Coast Council's Living Smart Program**

Please note the curriculum linked resources on the Maroochy Waterwatch website are in the original format (as produced for SCC by the QESSI HUB) , and are currently being reviewed and further formatted by the Sunshine Coast Council, ready for launch and inclusion on the Living Smart website in 2014.

In a recent local survey eighty-six per cent of teachers asked for assistance with local biodiversity knowledge in order to provide locally relevant environmental information to their students. The following links will take you to a wealth of information about the environment all around you.....local native species, biodiversity, ecosystems.
